Power Booster for Floor Sanders

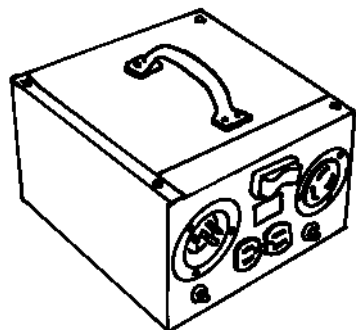

Clarke

Power Booster

for Commercial Floor Sanding Equipment

Clarke[®]
American-Sanders

Division of
ALTO[®]

KEY FEATURES

- Safe 4-wire inlet meets national electrical standards
- Powerful 8.4 KVA capacity transformer
- Dedicated duplex circuit breaker protected 120V outlets
- Rugged digital LED readout voltmeter
- Tough 14 gage steel case with low profile for stability

SPECIFICATIONS

Transformer	8.4 KVA Capacity
Voltmeter	Digital LED Readout
Inlet	4-Wire Locking, 250V 20A
Outlet	3-Wire, Locking, 250V 20A Duplex, Circuit Protected 3-Wire Straight Blade, Nylon Face, 125V 20A
Construction	14 Gage Steel with Non-Marking Gray Rubber Pads
Dimensions	9 x 9 x 6¾ in.
Weight	9 lbs.

- The Clarke-American Sanders power booster is a multi-purpose tool designed to:
 - Overcome low voltage conditions
 - Overcome high voltage situations
 - Provide dedicated circuit protected 120V outlets
- A simple 3-position operating switch provides quick selection of the mode needed.
- The **"boost"** position protects expensive electrical components from low voltage conditions and improves the machine performance.
- The **"buck"** position protects the components from rare but damaging high voltage situations.
- The **"neutral"** or center position maintains the input voltage through to the output and provides an accurate reading of actual input voltage.
- The rugged digital LED readout voltmeter assures accurate output readings for peak performance of sanding machines and electrical operated tools.
- The 4-wire inlet meets national electrical codes and provides safe operation of the powerful 230V system as well as the dedicated 120V system.
- The powerful 8.4KVA capacity transformer provides adequate power for the simultaneous operation of a large drum or belt sander and your choice of an edger, vacuum or polisher.
- This tool is ideal for new construction projects where the power supply is limited and shared by various trades. Simply connect the power booster to the power source and control a personal isolated power source. The dedicated duplex circuit protected 120V lines provide power for operation of edgers, vacuums, compressors, saws and routers.
- The rugged 14 gage steel case stands up to the most demanding conditions. The low profile provides maximum stability and the gray non-marking rubber "feet" protect your freshly sanded floor.
- Easily transported, the Clarke-American Sanders power booster provides a safe, efficient and rugged power source in one compact package weighing only 25 lbs.
